Now in the 6th year of programming!

(Note: this class was formerly offered through the University of Colorado at Boulder.)

"Amazing! It was definitely the greatest experience of my life. Learning how to work in the field, take measurements, make sure they're scientifically sound, & compile & report them will be very helpful for my career. I got everything I wanted out of this course & more. I love camping now & feel incredibly good emotionally & physically. I am recommending this class to all my friends." Zvika Aloni, July 2011
